

BMIT's suite of co-location services allows customers to focus their energies on what they are good at.

Cost savings and reduced capital expenditure are some of the immediate benefits achieved. BMIT applies its experience, resources and proven processes for you to attain these benefits and to ensure that your expected levels of quality and service are exceeded.

Why host with us

Our data centre facilities are connected to pan-European carrier-grade networks, ensuring 24 hours a day, 365 days a year support and monitoring of systems, network and infrastructure. Additional services are also available, including remote systems management, advanced managed services and specific gaming-centric applications and processes for online gaming operators.

Key features

- State-of-the-art infrastructure
- Resilient connectivity with multiple network providers
- High level of security and access control
- Independent power delivery with two distinct feeds
- Redundant generator set up for full backup
- Precision controlled air-conditioned environment
- Advanced fire detection and suppression system
- 24 x 7 support all year round
- Range of optional managed services
- Other services tailored to customer requirements
